

Table 1 - Glass

Beads

KØM 01699x50

Glass bead of transparent dark-blue (cobalt blue) glass, cylindrical.

Half a bead, fractured lengthwise.
Length 9.5 mm, diameter 9.0 mm.
Found in rubbish pit (A10001).

KØM 01699x52

Glass bead of opaque, white glass with dark irregularities in the glass, almost biconical.

Half a bead, fractured lengthwise.
Length 7.5 mm, diameter 8.1 mm.
Found in rubbish pit (A10001).

KØM 01699x59

Glass bead of transparent, yellowish-brown glass, ring-shaped.

Length 4.7 mm, diameter 9.6 mm.
Found in rubbish pit (A10001).

KØM 01699x63

Glass bead of transparent, yellow glass, globular. Modern Prosser bead.

Length 4.5 mm, diameter 6.5 mm.
Found in modern soil (soil-sieving trench 2652).

KØM 01699x67

Glass bead of transparent, bluish-green glass, almost cylindrical, melon-shaped/fluted.

Thin-walled glass bead with a large threading hole, a crack runs lengthwise.
Length 8.5 mm, diameter 9 mm.
Found when sieving plough soil (soil-sieving trench 2652).

KØM 01699x73

Glass bead of transparent, bluish-green glass, biconical, ring-shaped.

Length 6.5 mm, diameter 12.3 mm.
Found when sieving plough soil (soil-sieving trench 2251).

KØM 01699x128

Mosaic glass bead, polychrome, with a chessboard pattern alternating between white/blue and yellow/blue mosaic patterns framed by red lines.

Severely heat-exposed fragment.
Length 11.0 mm, diameter 15.5 mm.
Found when sieving plough soil (soil-sieving trench 2253).

KØM 01699x131

Bead of opaque, yellowish-green glass with blister-filled surface, cylindrical with rounded ends.

Length 5.9 mm, diameter 6.1 mm
Found when sieving plough soil (soil-sieving trench 2253).

KØM 01699x134

Glass bead of opaque, orange glass with blisters in the surface, barrel-shaped.

Length 7.0 mm, diameter 10.5 mm
Found in rubbish pit (A10004).

Table 1 - Glass

Beads

KØM 01699x140

Glass bead, polychrome, of translucent, brown glass with greyish-blue and dark-brown thread decoration melted on, severely deteriorated glass.

Half a bead, fractured lengthwise.

Length 6.5 mm, diameter 15.5 mm.

Found when sieving plough soil (soil-sieving trench 2754).

KØM 01699x145

Glass bead, three severely disintegrated fragments of translucent bluish-green glass, originally melon-shaped/fluted, of same type as x67.

Measurements: 5.0 x 5.9 mm; 5.0 x 4.9 mm; 5.0 x 3.8 mm.

Found when sieving plough soil (soil-sieving trench 2854).

KØM 01699x146

Glass bead of opaque, greyish-white glass with many impurities, almost cylindrical with rounded end surfaces.

Half a bead, fractured lengthwise.

Length 5.7 mm, diameter 8.4 mm.

Found when sieving plough soil (soil-sieving trench 2854).

KØM 01699x163

Mosaic glass bead, polychrome with blue mosaic patterns with yellow and red diamond motif, alternating with a horizontal cross-shaped motif, with yellow cross-arms and a red centre. Cylindrical, clearly folded mosaic bead with slightly indented end surface, which is decorated with a red glass thread all the way round the bead. Fragmented bead with about one third broken off at one end. Length 15.7 mm, diameter 7.0 mm.

Found when sieving plough soil (soil-sieving trench 2255).

KØM 01699x171

Mosaic bead, polychrome, of opaque, yellow glass. Almost cylindrical with rounded end surfaces, with three inlaid mosaic eyes with dark-brown centres and a pattern of greyish-white and dark-brown threads.

Length 8.6 mm, diameter 9.3 mm.

Found when sieving plough soil (soil-sieving trench 2856).

KØM 01699x187

Glass bead of transparent, greenish-brown glass, ring-shaped.

Length 5.3 mm, diameter 9.3 mm.

Found when sieving plough soil (soil-sieving trench 2457).

KØM 01699x196

Glass bead of opaque, reddish-brown glass with many air blisters on the surface, barrel-shaped.

Length 7.4 mm, diameter 10.0 mm.

Found when sieving plough soil (soil-sieving trench 2157).

KØM 01699x237

Glass bead of opaque, reddish-brown glass, barrel-shaped.

Originally with two inlaid, now missing, threads in a figure-of-eight pattern.

Length 5.9 mm, diameter 9.4 mm.

Found when sieving plough soil (soil-sieving trench 2750).

KØM 01699x244

Glass bead of translucent, dark, bluish-green glass, almost barrel-shaped with rounded end surfaces.

Length 6.6 mm, diameter 8.6 mm.

Found when sieving plough soil (soil-sieving trench 2248).

Table 1 - Glass

Beads

KØM 01699x251

Glass bead of translucent, dark, turquoise glass, slightly conical, melon-shaped.
Length 8.1 mm, diameter 10.8 mm.
Found when sieving plough soil (soil-sieving trench 2048).

KØM 01699x252

Glass bead of transparent dark-blue glass, ring-shaped with a singular chip.
Length 5.0 mm, diameter 11.1 mm.
Found when sieving plough soil (soil-sieving trench 2449).

KØM 01699x272

Glass bead of opaque, red glass, round. Modern Prosser bead.
Length 7.5 mm, diameter 9.5 mm.
Found when sieving plough soil (soil-sieving trench 3051).

KØM 01699x295

Glass bead, polychrome, of translucent, very dark, almost black disintegrated glass with inlaid, opaque, yellow wavy line encircling the bead.
Traces of red thread on the end surfaces.
Half a ring-shaped bead, broken lengthwise.
Length 4.0 mm, diameter 11.0 mm.
Found when sieving plough soil (soil-sieving trench 3155).

KØM 01699x311

Glass bead of transparent dark, bluish-green glass. Smaller fragment with the edge of the bead.
Length 12.5 mm, width 4.2 mm, thickness 2.4 mm.
Found when sieving plough soil (soil-sieving trench 3257).

KØM 01699x315

Glass bead of transparent, dark-blue glass, biconical.
Length 7.5 mm, diameter 7.5 mm.
Found when sieving plough soil (soil-sieving trench 2359).

KØM 01699x322

Glass bead, metal-foiled gold-foil bead with two elongated, almost cylindrical segments, yellowish-brown outer glass.
Length 18.6 mm, diameter 6.1 mm.
Found when sieving plough soil (soil-sieving trench 3260).

KØM 01699x329

Glass bead of transparent, dark-blue glass, ring-shaped.
Length 5.1 mm, diameter 11.1 mm.
Found in pit (A10004).

KØM 01699x335

Glass bead of opaque, white glass with some air blisters in the surface, fragment of an almost barrel-shaped bead with rounded end surfaces. The bead is broken lengthwise, just over half the bead is preserved.
Length 11.7 mm, diameter 9.4 mm.
Found in a posthole from House 3 (A10004a).

Table 1 - Glass

Beads

KØM 01699x354

Glass bead of translucent whitish-yellow, clear glass. Tubular bead with rounded end surfaces and two round indentations, suggesting there were originally two eyes or spots inlaid into the glass. Length 9.0 mm, diameter 8.5 mm. Found when sieving plough soil (soil-sieving trench 3358).

KØM 01699x355

Glass bead of translucent, drawn, dark-blue glass, cylindrical with uneven, chopped-off end surfaces. Clear lines running lengthwise in the glass parallel to the small, cylindrical hole. Length 8.1 mm, diameter 10.3 mm. Found when sieving plough soil (soil-sieving trench 3358).

KØM 01699x357

Glass bead of translucent, dark-blue glass, ring-shaped. About half a bead, fractured lengthwise. Length 4.2 mm, diameter 9.7 mm. Found when sieving plough soil (soil-sieving trench 2161).

KØM 01699x366

Glass bead of opaque, reddish-brown glass with some air blisters in the glass, barrel-shaped. Length 5.7 mm, diameter 9.4 mm. Found in a posthole from House 5 (A10241).

KØM 01699x367

Glass bead of translucent, dark-blue glass, ring-shaped. About half a bead, fractured lengthwise. Length 3.4 mm, diameter 8.6 mm. Found during sieving (A3458).

KØM 01699x423

Glass bead of opaque, reddish-brown glass with air blisters in the glass, oblong, oval shape. Length 7.57 mm, diameter 7.0 mm. Found during sieving (A10115).

KØM 01699x424

Glass bead of transparent, dark-blue glass, with oblong, rectangular and rounded cross section. One end is damaged. Length 15 mm, width 8 mm, height 5 mm. Found in a pit (A10458).

KØM 01699x454

Glass bead of opaque, orange glass with air blisters in the surface, barrel-shaped. Length 7.7 mm, diameter 10.3 mm. Stray find.

KØM 01699x470

Glass bead of translucent, bluish-green glass. Half a ring-bead, fractured lengthwise. Length 5.6 mm, diameter 6.4 mm. Found in rubbish pit (A10109).

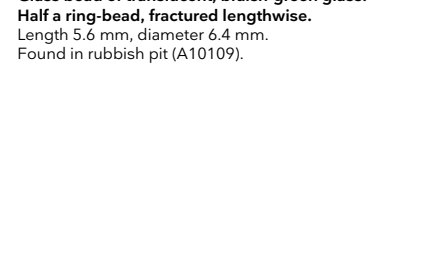

Table 1 - Glass Beads

KØM 01699x698

Glass bead of transparent, bluish-green glass, wound bead with two segments.
Length 8.7 mm, diameter 10.0 mm.
Found in pit house (A12050).

KØM 01699x927

Glass bead of translucent, blue glass. Half a ring-bead, fractured lengthwise.
Length 4.5 mm, diameter 9.2 mm.
Found when sieving a cultural layer (A12570 section A).

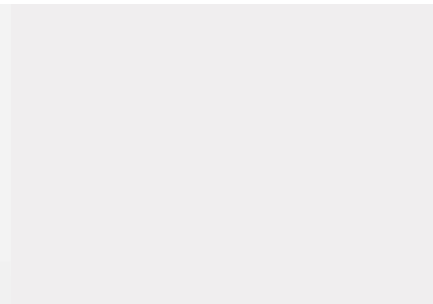

KØM 01699x928

Glass bead of opaque, light-green glass, ring bead.
Length 3.8 mm, diameter 7.5 mm.
Found in a pit/well (A12700).

KØM 01699x1042

Glass bead, metal-foiled, with one round segment, gold-foil bead, with yellowish-brown outer glass, with a clear incision around the hole.
Length 5.1 mm, diameter 6.8 mm.
Found in the uppermost layer of a well (A12548).

KØM 01699x1179

Glass bead, monochrome, gold-foil bead with three round segments, and brown outer glass.
Found during sieving of a pit (A30634).
