

Table 2 - Rock crystal Beads

KØM 01699 x 362

Rock-crystal bead, polyhedral, almost round faceted bead with hexagonal facets around the middle and pentagonal facets around the hole.

Length 7.7 mm, diameter 8.6 mm.

Found when sieving plough soil (soil-sieving trench 3352).

KØM 01699 x 364

Rock-crystal bead, long octagonal bead with a prismatic cut and flat ends and worn surface.

Length 14.9 mm, greatest width 12.0 mm.

Found when sieving plough soil (soil-sieving trench 3448).

KØM 01699 x 136

Rock-crystal bead, long cornerless cube with diamond-shaped facets on each of the four sides and flat ends.

Very worn surface.

Length 10.4 mm, smallest width 7.2 mm, largest width 8.3 mm.

Found when sieving plough soil (soil-sieving trench 3448).

KØM 01699 x 1060

Rock-crystal bead, almost spherical.

Length 11.9 mm, diameter 12.3 mm.

Stray find, no information about find spot.
